

## FEATURES

- Integrated Microstepping Drive/ NEMA 17 High Torque Motor
- +12 to +48 VDC Input Voltage
- Low Cost
- Extremely Compact
- Optically Isolated Logic Inputs will Accept +5 to +24 VDC Signals, Sourcing or Sinking†
- Automatic Current Reduction
- Configurable:
  - Motor Run/Hold Current
  - Motor Direction vs. Direction Input
  - Microstep Resolution to 256 Microsteps/Full Step
- Available Configurations:
  - Single Shaft\*
  - Linear Actuator
  - Factory-Mounted Optical Encoder\*
  - Double Shaft End with Knob for Manual Positioning\*
- Available in Three Motor Lengths\*
- Current and Resolution May Be Switched On-The-Fly
- Single Supply
- Interface Types:
  - Keyed and Locking Pin and Receptacle (C Connector)
  - Pluggable Terminal Strip
  - 12" (30.5 cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

\* Rotary Motor Only.

† C Connector Version Only. Other Versions Require 5 Volt Sinking Outputs.

## DESCRIPTION

The MDrive NEMA 17 high torque Integrated Motor and Driver is ideal for designers who want the simplicity of a motor with on-board electron-

ics, but without the expense of an indexer on each axis. The low cost MDrive17 allows the system designer to decide the best method of control. The MDrive17's integrated electronics eliminates the need to run the motor cabling through the machine, reducing the potential for problems due to electrical noise.

The MDrive17 uses a NEMA 17 frame size 1.8° high torque motor combined with a microstepping drive, and accepts up to 14 resolution settings from 1/2 to 256 microsteps per full step. Setup parameters include Microstep Resolution, Motor Run/Hold Current, and Motor Direction with respect to the direction input. These settings may be changed on-the-fly or downloaded and stored in non-volatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port. Operating voltage for the MDrive17 range from +12 to +48 VDC.

The versatile, compact MDrive17 is available in multiple configurations to fit various system needs. These options include: a single shaft stand-alone device, dual shaft rotary motor with optical encoder or control knob, or a long life ACME screw linear actuator. The rotary MDrive17 is also available in three different motor lengths: 13, 15 & 19. Interface connections are accomplished using either a 12 position keyed and locking pin and receptacle, a 7 position terminal strip, or 12" (30.5 cm) flying leads.

The MDrive17 is a compact, powerful and inexpensive solution that will reduce system cost, design and assembly time for a large range of stepping motor applications.

## CONFIGURATION UTILITY

The IMS Motor Interface software is an easy to install and use graphical user interface (GUI) for configuring the MDrive17 from the parallel port on your computer. Access the GUI via the IMS SPI Interface included on the CD shipped with the product, or download at [www.imshome.com](http://www.imshome.com). An optional parameter setup cable is available for ease of connecting and configuring this MDrive product.

Configuration Utility features include:

- Easy installation.
- Automatic detection of MDrive version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Ease of use via single screen interface (shown below).

The IMS Motor Interface GUI simplifies MDrive configuring with a single screen interface.

### PARAMETER SETUP CABLE

A low cost accessory which eliminates the need for the user to wire communications. Included in this cable is built-in logic level shifting circuitry to accommodate the 3.3v ports on some PCs.

This cable plugs in easily to connect a standard DB-25 PC parallel port to the 10 pin header (P2) on the MDrive17. Order Cable Part No. ***MD-CC100-000***. In addition, a cable adaptor is required for the 12 position pin and receptacle connector (P1) on C Connector Versions. Order Adaptor Part No. ***MD-ADP-1723C***.

### PROTOTYPE DEVELOPMENT CABLE

To expedite interface to MDrive17 with C Connector. Order Cable Part No. ***ADP-3512-FL***.

### FACTORY-MOUNTED ENCODER VERSION

The MDrive17 is available with a factory-mounted optical encoder. Available line counts are 100, ***200***, 300, 400, ***500***. Encoders are available in both single-end and differential configurations. All encoders have an index mark.

### CONTROL KNOB VERSION

The MDrive17 is available with a factory-mounted knob for manual shaft positioning.

### LINEAR ACTUATOR VERSION

The MDrive17 with long life ACME Screw Linear Actuator is available with the following travel/full step:

Screw A	.....	0.00125"/full step
<b><i>Screw B</i></b>	.....	<b><i>0.000625"/full step</i></b>
<b><i>Screw C</i></b>	.....	<b><i>0.0003125"/full step</i></b>
Screw D	.....	0.00015625"/full step

External linear and captive versions are also available. Consult factory for further information.

The MDrive17 comes standard with a 6" (152.4mm) screw length plus the mounting end thread. Custom lengths are available from 2.0" to 24.0". Custom length screws do not include a mounting end thread.
